

Company

Mission Statement:

We test and install superior quality suspension systems for the serious off-road competitor and enthusiast.

To ensure continuous improvement of quality, we give priority to certain items that we take to heart. This includes providing safe products and services that meet customer requirements.

Our organization offers its customers a range of services from conversions, modifications and installation on motocross, off-road, and ATV's.

Our team strives to provide products and services of superior quality and personalized service.

We support our work with processes and methods based on continuous improvement. Our staff participates in various training programs designed to conserve and develop required skills. We race and test ride everything we sell and install.

Commitment:

Customer service is our highest priority.

Provide the highest quality of work with front of the pack results.

We will make sure it is done right the first time.

Technical Support:

Knowledge is power. We strive to always educate and mentor our

customers. We have a vast network of allied tuners that share information to better serve the rider.

Do not hesitate to contact us if you have any questions or concerns.
